

“ This is a pictorial report to our alumni and friends on the building progress which has been made possible by the development campaign to which so many of you made generous contributions. The completion of the new library and the chemistry building, and the improvement of athletic facilities, will satisfy the present physical requirements of the undergraduate department and in some areas will allow for the anticipated expansion in enrollment. ”

W. H. THOMAS, JR., '36, VICE PRESIDENT FOR DEVELOPMENT

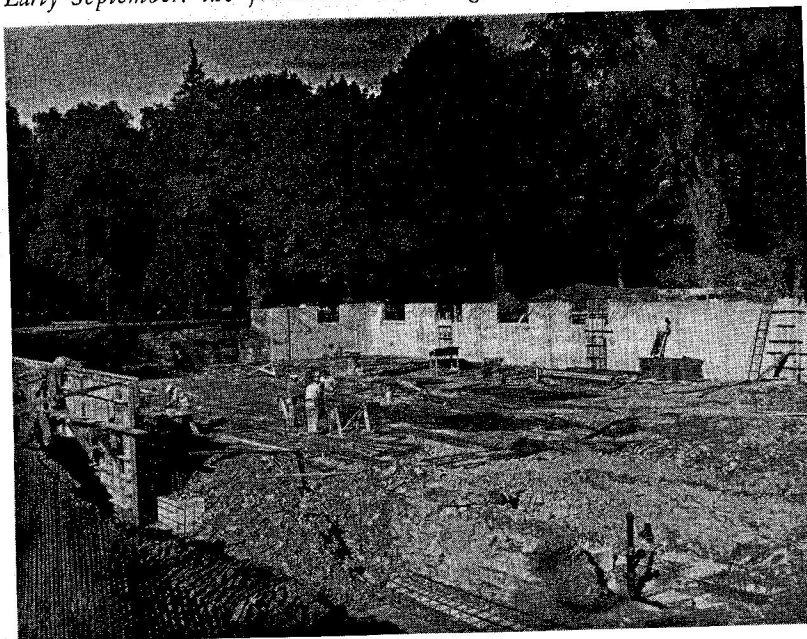

Signing the million-dollar contract for construction of the library. Left to right, George Farr, Jr., '26, a trustee of the College; Mr. Thomas; and S. S. Lord, Kenyon's business manager.

Excavation begins for the new library. The photograph was made looking north, with Cromwell House in the background.

Early September: the foundation walls begin to rise.

The library foundation as it looked on November 3.

THE GORDON KEITH CHALMERS MEMORIAL LIBRARY

Architect: O'Connor and Kilham, New York

Construction by: John H. Eisele Company, New York

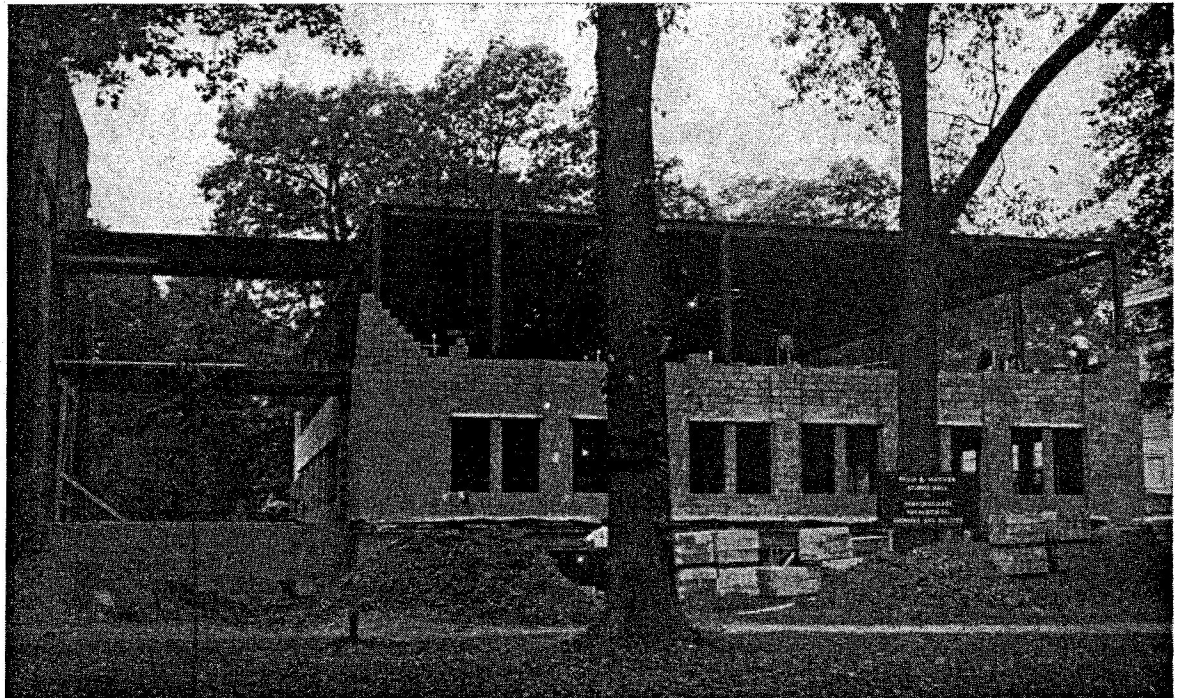

Description: approximately 50,000 square feet in two floors and a basement; two-story lobby with exhibition space on second floor; rare book room; periodicals room; offices; three seminar rooms; lounge and reading rooms; art room; music listening room (with booths); microfilm reading room; Kenyoniana Room; vault. Three floors of stacks. Surrounding the stacks will be carrels and reading areas for students, and enclosed carrels for faculty members. The exterior wall treatment will be split-face sandstone with extensive areas of glass.

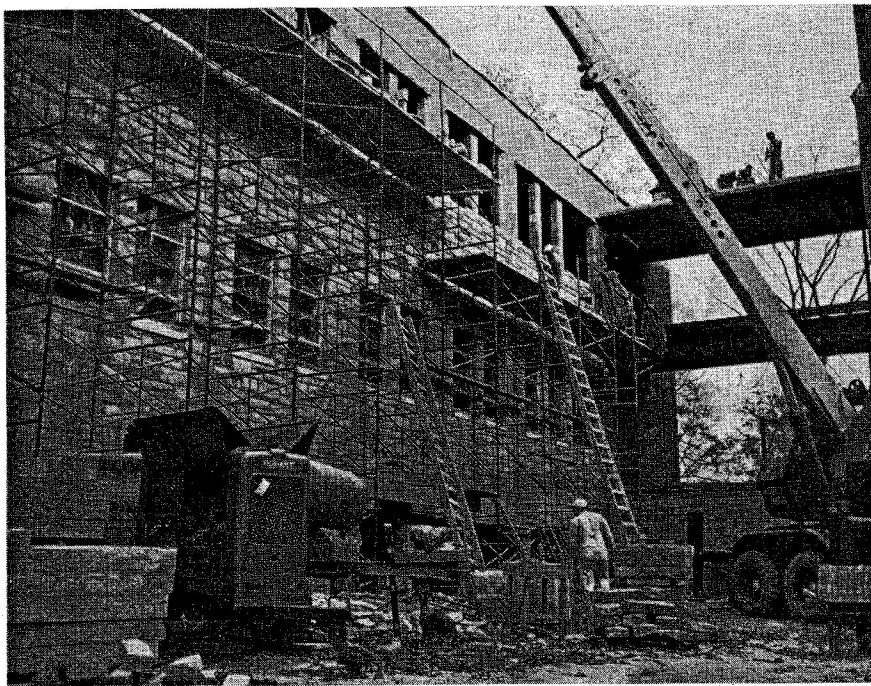

Construction contract: \$998,000 (allocated in campaign: \$1,000,000)

Needed for equipment: \$200,000

Completion date: August 1, 1962

Philip R. Mather Hall in early October.

Progress on the science building as of November 3.

THE PHILIP R. MATHER HALL

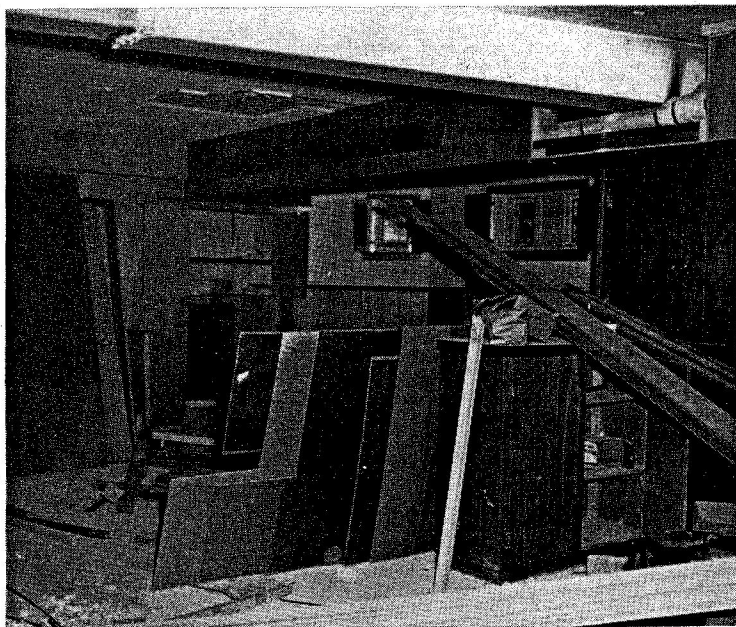

Design and construction: The Austin Company, Cleveland

Description: 25,000 square feet in two floors and a basement; six large laboratories; two lecture rooms; one seminar room; three substantial storerooms and one air-conditioned instrument room; three-story science library; five faculty offices with connecting research laboratories. The chemistry department will be housed in this new building, which will be connected with old Mather Hall by a glassed-in passageway. Philip R. Mather Hall will be faced with split-face and smooth-surface sandstone and will have a limestone trim.

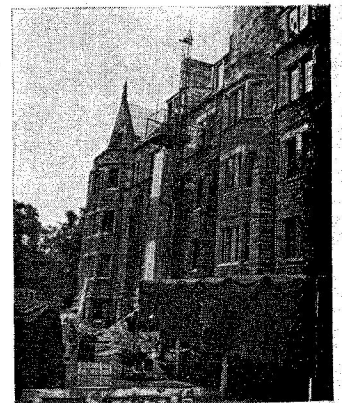

Construction contract: \$509,000 (allocated in campaign: \$350,000)

Needed for equipment: \$100,000

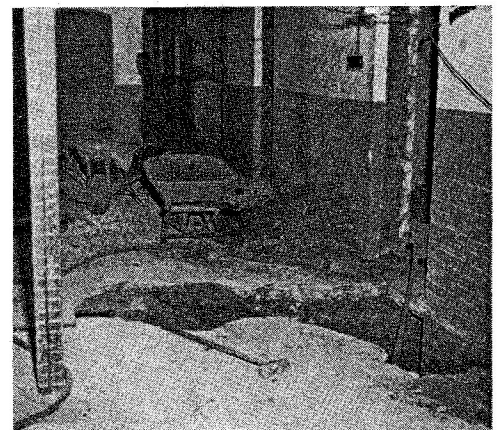

Completion date: February 1962

Mid-June: construction of a new lounge for Alpha Lambda Omega in the basement of North Leonard.

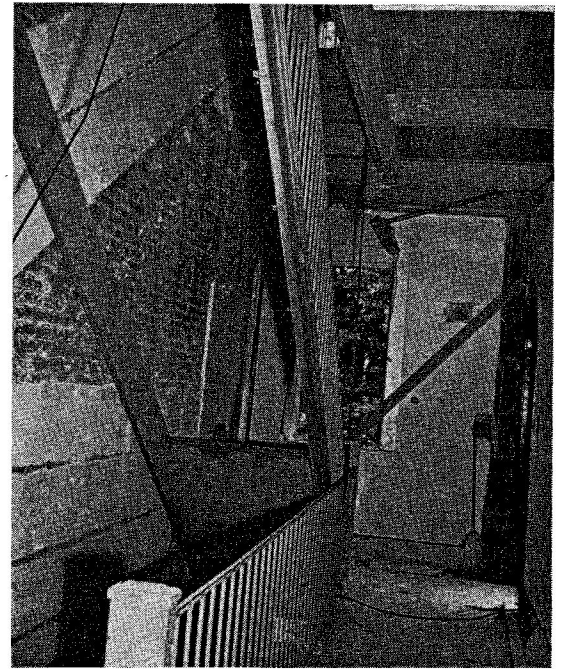

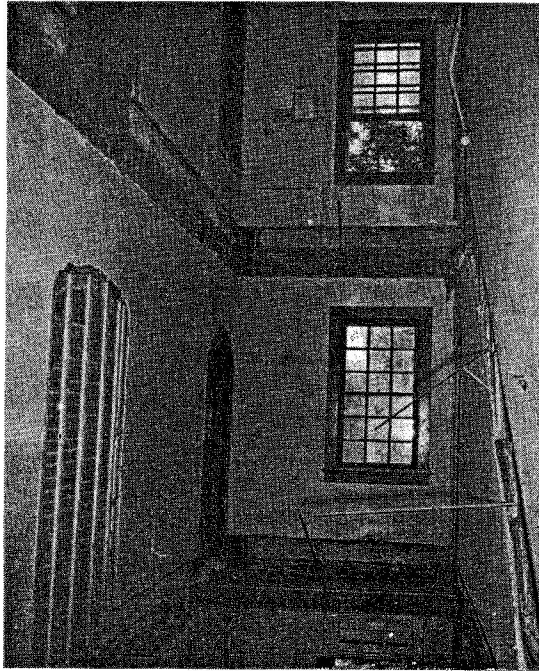

Above: exterior of Leonard Hall (east facade). Below: the basement of Leonard, looking from north to south.

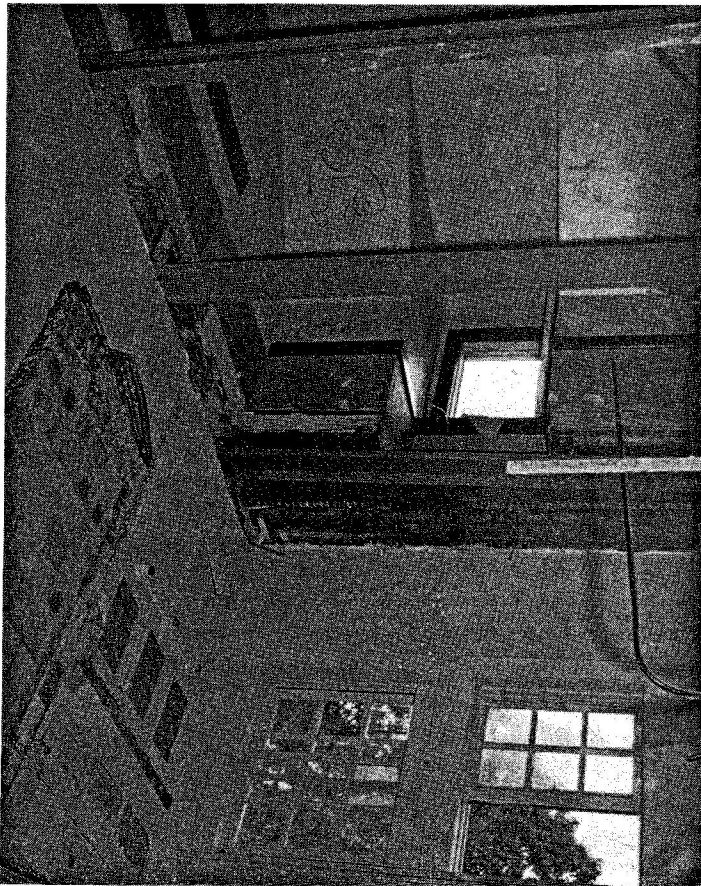

Above: three of the Kenyon students who worked on the dormitory renovation. Left to right, Albert Shuckra, '62; Mil-lard Peck, '62; and Calvin Frost, Jr., '63. At right: (1) South Hanna, looking from the basement through the gutted floors to the second story; (2) North Hanna—the entrance and the remains of the old staircase to the second floor.

Hanna Hall: looking up through the gutted central section of the building. The man on the ceiling (the work of Jack Carter, '49) is all that remains of Phi Kappa Sigma's third-floor taproom.

DORMITORY RENOVATION

Architects and engineers: George S. Rider Company, Cleveland

General contractor: Industrial Construction Company, Inc., Cleveland

Mechanical contractor: The Gesling Company, Lancaster, O.

Electrical contractor: Atlas Electrical Construction Company, Elyria, O.

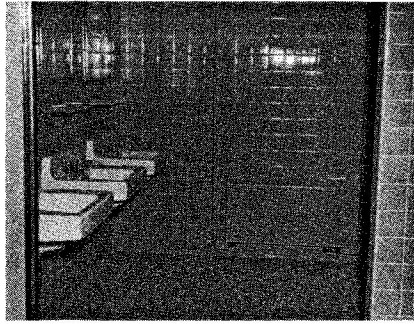

Description: the buildings are now in new or equal-to-new condition throughout. Student capacity has been increased by about 60 (total now: 233). All sleeping quarters have been refurnished.

Total project cost: \$523,273

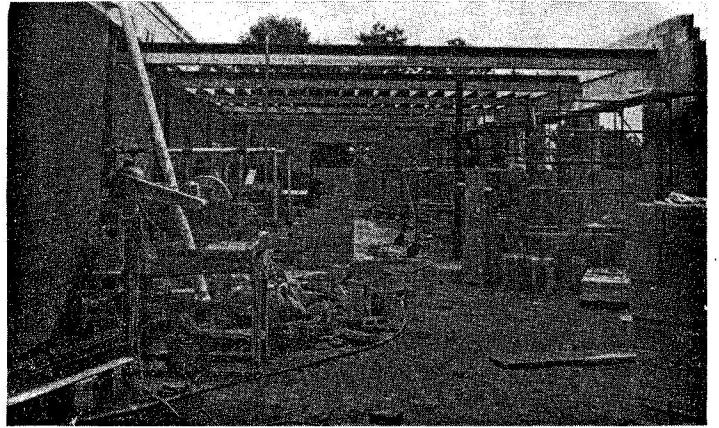

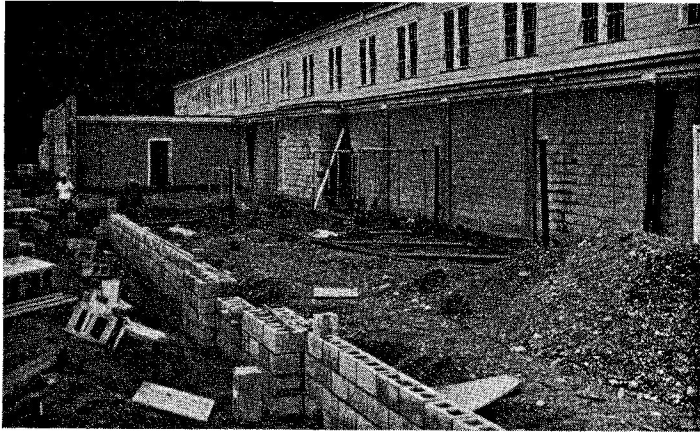

Furniture and furnishings: \$50,000

Old dormitory furniture was auc-tioned off at Port Kenyon in late summer.

At left: one of the remodeled rooms in Leonard Hall. Above: one of the new washrooms in Hanna.

Above, left: the Field House addition in mid-August. Right: as it looked in September.

FIELD HOUSE ADDITION AND PIERRE B. McBRIDE FIELD

General contractors for Field House addition: Kokosing Construction Company, Fredericktown, O. (general); Max Williams, Mount Vernon, (mechanical); Dalrymple Electric Service, Mount Vernon (electrical)

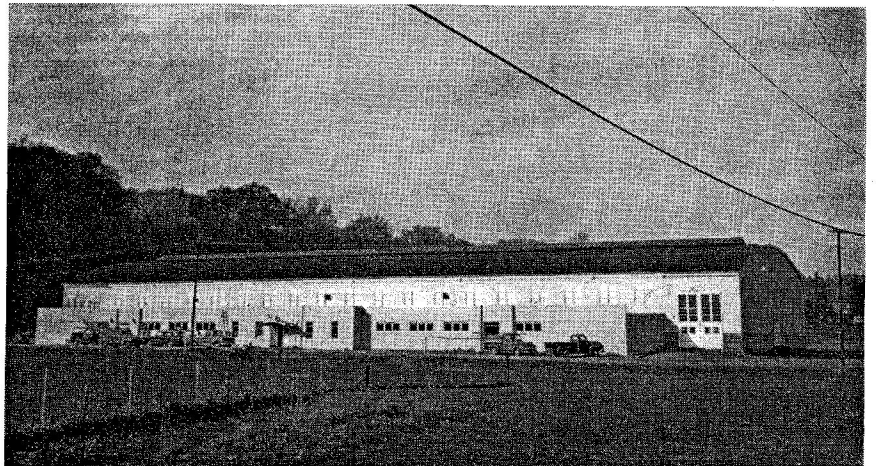

General contractor for McBride Field: Kokosing Construction Company

Description: 1) Field House addition—five athletic offices; two shower rooms; large locker room; coaches' room; training room; storage and equipment rooms (note: a women's lounge is also a part of this project, but will be located within the Field House addition); 2) the new playing field is laid out north-south and will eliminate the "into-the-sun" handicap which Kenyon football has long suffered on east-west Benson Field.

Estimated project cost: \$85,000 (allocated in campaign: \$30,000 for Field House addition. Construction contract on Field House: \$50,079)

Completion dates: 1) Field House addition—December 1, 1961; McBride Field will be ready for use next autumn

The Field House addition on November 3.

McBride Field in August, when grading was still going on.

At left and at right: two of the new College houses in the Kokosing area. Below: Rand Dr. looking south (at right is a new house being erected by a Bexley student).

The new home of Mr. and Mrs. Arthur Lave. Mr. Lave is a member of the athletic staff.

The newest College house.

The home of Mr. and Mrs. Gerrit Roelofs. Mr. Roelofs teaches in the English department. (The house is located near Bexley Place.)

KOKOSING AND HARPER WOODS DEVELOPMENT

To date the College has spent approximately \$100,000 on this new residential area. This cost includes the construction of three new faculty houses; the paving of Kokosing Dr.; the creation of Rand Dr. (named in honor of the late Edson R. Rand, comptroller of the College); and the installation of a water main.

“ The building program illustrated in these pages satisfies only the first of the long-range needs of the college and seminary departments. We must keep constantly before us the fact that Kenyon cannot stop here if it is to enjoy the financial endowment and the physical properties which a first-class college of liberal arts must have. The next step will be the realization of some of the following ” —

ENDOWMENT

Salary endowment (college)	\$2,750,000
Salary endowment (seminary)	750,000
Scholarship endowment (both departments)	1,000,000

BUILDINGS

Dormitory for undergraduates	300,000
Bexley library	350,000
Bexley chapel	75,000
Mather renovation	50,000
College library renovation	100,000

EQUIPMENT

New college library	200,000
New science building	100,000

DEFERRED MAINTENANCE

Bexley student housing	150,000
Power plant	500,000

GRAND TOTAL	\$6,400,000
